

Eco-Solar Home Tour 2018

Sunday 3 June 2018 Noon to 4:30 pm

Belgravia Solar Church

Tour Day: Sunday
Address: 11526-76 Ave NW
Hosts: St Paul's United
Church Members
and Skyfire Energy
Parking: On Street
Energide Rating: n/a

Summary points why people need to see your church

- We just installed a 27 kW solar system with the latest Solar Edge inverters on our perfectly sloped south facing roof.
- This was the largest system with the best economics we could fit on our existing electrical service.

What will people see and learn about at your church?

- Solar system walk-through and summary of the process to complete the project
- We can also discuss the roofing replacement and insulation upgrade

What are the main things people will see at your church?

- Solar array
- Inverters and electrical tie in

Are there main items that they can't see?

- Insulation

Eco-Solar Home Tour -2018

Belgravia Solar Church

Why is this church on the tour?

We are proud that our church took the leap to go solar, we think it says a lot about what we are committed to as a community and is an example that other community buildings and churches can follow. All money came from grants and dedicated donations, so the project is already revenue positive and will significantly green the grid. We were even exporting power in January.

What features save on energy costs?

- Solar panels
- Insulation and window upgrades
- LED lights

What features save on water costs?

- Low flush toilets
